PROFILE

AZ-104 certified Azure Administrator and Power Automate specialist with proven impact automating enterprise workflows in hospitality and education. Built and deployed end-to-end automation systems that eliminate 200+ hours/year of manual night-audit work for hospitality properties. Expertise across Azure IaaS, Windows Server, Power Platform, SharePoint, and Python. Seeking Cloud / Power Platform / Automation roles in Toronto.

Skills

Power Automate, SharePoint Online automation, Power Platform workflows, Microsoft 365 automation, Azure automation, Python automation scripting, PowerShell scripting, API integrations & webhooks, JSON expressions, PDF generation & processing, Opera PMS report automation, night audit & revenue reconciliation, Azure administration (AZ-104), Microsoft 365 administration, Power BI, Intune, Linux fundamentals, Git & GitHub

EMPLOYMENT HISTORY

❖ **Microsoft 365 Administrator Intern, Holiday Inn Express** Jan 2025 — April 2026

Markham, ON

- Designed, deployed, and administered a **fully automated Microsoft 365 solution** using **Power Automate, SharePoint Online, and Outlook**, executing **nightly with zero manual intervention**.
- Built automation to **download, parse, rename, classify, and archive PMS reports** into structured, date-based **SharePoint libraries**, then distribute finalized report sets to management automatically.
- Eliminated **4–5 hours of manual work per night**, saving **1,500+ hours annually**, with **99.9% execution reliability** and no post-deployment manual maintenance.
- Developed and maintained a **Python-based reporting service** (hosted on **HuggingFace**) to transform raw operational data into **branded PDF summaries**, reducing **30–45 minutes of nightly formatting** per run.
- Administered **Microsoft 365 services** including **SharePoint permissions, Power Automate flow governance, Outlook integration**, and access control aligned with operational security needs.
- Acted as **overnight IT support escalation**, resolving **95% of incidents immediately** involving **Wi-Fi, PMS, keycard systems, M365 apps, printers, and POS terminals**.

❖ **SharePoint and Power Automate Administrator, The Ismaili Canada** Sep 2025 — Present

Toronto, ON

- Administered **10+ SharePoint Online sites** and **25+ lists/libraries**, managing **role-based permissions for 100+ users** across regional and national teams while enforcing M365 governance and data security standards.
- Built and maintained **30+ Power Automate flows** integrating **SharePoint, Microsoft Forms, and Outlook**, cutting manual coordination time by **40–60%** and improving response SLAs for approvals and notifications.
- Designed end-to-end **event and operations workflows** handling **1,000+ records** annually, ensuring data accuracy, auditability, and centralized reporting for leadership.
- Led **requirements gathering, documentation, and optimization** of Power Platform solutions, reducing recurring support issues by **30%** and enabling scalable, low-maintenance automation.

❖ **Night Auditor, Holiday Inn Express** Aug 2025 — December 2025

Markham, ON

- Performed complete night audit operations, reconciling **150–250 daily transactions** across **credit cards, cash, room charges, and third-party bookings**, closing the business day with **99.9% accuracy** in Opera PMS.
- Verified all revenue streams, prepared nightly audit packages, and generated **daily revenue and occupancy reports** to ensure accurate financial handover to management.
- Served as the **overnight operations lead**, resolving guest issues, coordinating with on-call teams, and maintaining service continuity during late-night hours.
- Enforced **cash handling, PCI, and brand audit standards**, identifying and escalating variances promptly to prevent revenue leakage and ensure full compliance during overnight operations.

❖ Auditor/Front Desk Agent, Holiday Inn

Jun 2024 — May 2025

Sudbury, ON

• Delivered front-desk and night-audit operations for **100–200 guests daily**, contributing to a **20% improvement in guest satisfaction and department ratings** through effective service recovery and issue resolution.

• Reconciled **200+ daily transactions** across **5+ revenue streams** using **Opera PMS and Excel**, maintaining **100% financial accuracy** for direct and third-party bookings (Booking.com, Expedia).

• Prepared and submitted **3 audit reports per shift**, balancing nightly accounts, resolving payment discrepancies, and producing revenue and occupancy reports for management decision-making.

• Coordinated with **housekeeping, maintenance, and IT teams** to maintain **100% room readiness** during sold-out periods and reduce overnight system downtime by **25%**.

• Trained and mentored **4 new front-desk agents** on check-in procedures, PMS workflows, guest recovery protocols, and audit handover standards.

EDUCATION

❖ George Brown College

May 2025 — Apr 2026

Cloud Computing, Post Graduate Diploma

Toronto, ON

❖ Cambrian College

May 2024 — Feb 2025

IT Business Analysis, Post Graduate Diploma

Sudbury, ON

❖ Pune University

Nov 2020 — Jul 2023

Bachelor of Computer Applications

India

CERTIFICATIONS

❖ Azure Administrator Associate (AZ104)

Nov 2025

Microsoft

❖ Azure Fundamentals (AZ900)

Aug 2025

Microsoft

PROJECTS

❖ Enterprise PMS Daily Reporting Automation

• Built end-to-end Power Automate + SharePoint solution that fully automates nightly property-management reports.

• Ingests reports from Outlook → parses and renames using content-based logic (contains(), toLower(), replace())

• Stores in dated SharePoint folders → sends final email with clean attachments using proper array objects and base64ToBinary()

• Eliminated 4–5 hours of manual night-audit work nightly (1,500 + hours saved per year) with 100 % reliability since go-live

• Resolved ~200 failed runs during development; now runs unattended 365 days/year

❖ Automated Night Audit PDF Generator – Python + HuggingFace Spaces (Live)

• <https://huggingface.co/spaces/ayanhiex/greenerstay>

• Built a Python microservice (ReportLab + FastAPI) deployed on HuggingFace Spaces that receives JSON data from Power Automate and instantly returns professionally formatted, branded PDF reports.

• Eliminated 30–45 minutes of nightly manual formatting in Microsoft Word; now generates Guest In-House, Manager Flash, Revenue Summary, and other PDFs with perfect styling and consistent headers/footers.

• Integrated directly into existing Power Automate + SharePoint pipeline via HTTP POST → base64 response, enabling 100 % end-to-end automated report creation, storage, and email delivery.

• Handles dynamic tables, date logic, and error states; runs 365 days/year with zero maintenance.
